A MIND WITHOUT ADDICTION, A LUNG WITHOUT CONTAMINATION

We are excited to announce the return of the National Tobacco Control Conference (NTCC), now held in conjunction with the Lung Health Summit 2026, a key national platform advancing a whole-of-society approach to tobacco control and respiratory health.

Organised by the Malaysian Council for Tobacco Control (MCTC), the National Cancer Society of Malaysia (NCSM), University of Cyberjaya, and strategic partners, the conference brings together public health professionals, educators, policymakers, civil society leaders, researchers, and advocates to strengthen efforts in reducing tobacco use and improving lung health in Malaysia.

We warmly invite you to join us under the theme “A Mind Without Addiction, a Lung Without Contamination,” reflecting a shared commitment to addressing behavioural and environmental determinants of health through evidence-based strategies, community-driven advocacy, and strong policy implementation.

Over three days, the programme will cover public education, awareness campaigns, fiscal policy, and innovations in tobacco control and lung health. It will provide a platform for civil society organisations (CSOs), healthcare and pharmaceutical sectors, academic institutions, and local authorities to exchange insights, share effective initiatives, and shape forward-looking strategies.

We encourage active participation to foster collaboration and drive meaningful progress towards a tobacco-free Malaysia and improved national lung health outcomes.
